Louisiana Medicaid
Anti-Allergens

The *Louisiana Uniform Prescription Drug Prior Authorization Form* should be utilized to request clinical authorization for anti-allergen agents.

Additional Point-of-Sale edits may apply.

*These agents may have **Black Box Warnings** and may be subject to **Risk Evaluation and Mitigation Strategy (REMS)** under FDA safety regulations. Please refer to individual prescribing information for details.*

Peanut (*Arachis hypogaea*) Allergen Powder-dnfp (Palforzia®)

Approval Criteria

- For a non-preferred agent, there is no preferred alternative that is the exact same chemical entity, formulation, strength, etc.; **AND**
- For a non-preferred agent, previous use of a preferred product - **ONE** of the following is required:
    - The recipient has had a *treatment failure* with at least one preferred product; **OR**
    - The recipient has had an *intolerable side effect* to at least one preferred product; **OR**
    - The recipient has *documented contraindication(s)* to all of the preferred products that are appropriate to use for the condition being treated; **OR**
    - There is *no preferred product that is appropriate* to use for the condition being treated; **OR**
    - The prescriber states that the recipient is currently using the requested medication; **AND**
- The recipient is at least 4 years of age on the date of the request; **AND**
- The recipient has a confirmed diagnosis of peanut allergy and this is **stated on the request**; **AND**
- The medication is prescribed by, or the request states that this medication is being prescribed in consultation with, **ONE** of the following specialties:
    - Allergy; **OR**
    - Otology/Laryngology/Rhinology; **OR**
    - Ophthalmology/Otology/Laryngology/Rhinology; **AND**
- The prescriber **states on the request** that the recipient has been given a prescription for an auto-injectable epinephrine product within the previous 12 months; **AND**
- By submitting the authorization request, the prescriber attests to the following:
    - The initial dose escalation and first dose of each up-dosing level of Palforzia® will be administered in a healthcare setting under the supervision of a physician with experience in the diagnosis and treatment of severe allergic reactions and the patient will be observed for at least 60 minutes; **AND**
    - The recipient does not have any of the following conditions:
        - Uncontrolled asthma; **OR**

        - A history of eosinophilic esophagitis or other eosinophilic gastrointestinal disease; **AND**
    - The prescribing information for the requested medication has been thoroughly reviewed, including any Black Box Warning, Risk Evaluation and Mitigation Strategy (REMS), contraindications, minimum age requirements, recommended dosing, and prior treatment requirements; **AND**
    - All laboratory testing and clinical monitoring recommended in the prescribing information have been completed as of the date of the request and will be repeated as recommended; **AND**
    - The recipient has no concomitant drug therapies or disease states that limit the use of the requested medication and will not receive the requested medication in combination with any medication that is contraindicated or not recommended per FDA labeling.

Reauthorization Criteria

- The recipient continues to meet initial approval criteria; **AND**
- The prescriber **states on the request** that the recipient is established on the medication with evidence of a positive response to therapy.

Duration of initial and reauthorization approval: 12 months

Sweet Vernal, Orchard, Perennial Rye, Timothy, and Kentucky Blue Grass Mixed Pollens Allergen Extract (Oralair®)
